### What is Mildew-X

Mildew-X is a revolutionary mildewcide paint additive designed to prevent mold and mildew from growing on the dried film of interior and exterior surfaces...NATURALLY!

### Where can Mildew-X be applied?

Mildew-X can be applied on most interior and exterior surfaces, including kitchens and pantries.

### What types of mildew does it protect from ?

Studies have shown that Mildew-X is effective at controlling some of the most common types of mildew, including Alternaria and Aspergillus.

### What preparation is needed before applying Mildew-X?

For best results, follow manufacturer's instructions for cleaning and preparing the surface. It is important that all mildew be eliminated and the structure be dry before painting with Mildew-X. Remove sources that can contribute to mildew growth.

### How long does Mildew-X last?

Testing has shown that Mildew-X effectively controls mildew for up to 3 years.

### Will it affect the appearance of the finish?

Mildew-X will not affect the color or drying time of the coating it is mixed with. AND it does NOT contain any VOC's

### Where is the EPA Registration Number?

Mildew-X has not been registered by the United States Environmental Protection Agency . Mildew-X qualifies for exemption from registration under FIFRA section 25(b). It is a minimum risk pesticide.
